## **A Further Step Toward Strengthening Orthopedic Scientific Collaboration in the Turkic World**

Dear Colleagues,

As the Azerbaijan Orthopedic Association, we proudly continue our efforts to expand national and international scientific collaborations in the field of orthopedics and traumatology and to raise the standard of orthopedic education.

In recent years, the close scientific ties we have established with Turkic World countries have created significant opportunities for the joint discussion and advancement of contemporary trends in orthopedics. In this context, the Turkic World Orthopedics and Traumatology Congresses held in Azerbaijan, Kazakhstan, Kyrgyzstan, and Bosnia and Herzegovina have fostered the exchange of scientific knowledge and strengthened orthopedic solidarity.

The *Journal of Orthopedic Surgery and Trauma*, set to launch in April 2025, is the result of an important international collaboration and carries great significance for the Azerbaijan Orthopedic Association. The journal aims not only to unite the scientific work of orthopedic specialists across the Turkic World but also to become a prestigious platform for publishing high-quality research.

With our commitment to ethical surgical standards, continuing medical education, and international cooperation, we will continue to contribute to the advancement of orthopedic science in our region. We invite all our colleagues to join us on this scientific platform, to strengthen scientific exchange, and to enhance orthopedic unity.

We firmly believe that the steps we take together today will lay the foundation for a stronger orthopedic community in the future.

Sincerely,

*Dr. Nizami Mammadov*
