**From Kyrgyz Society of Traumatology and Orthopedics**

Dear Colleagues,

On behalf of the Association of Bone and Joint Surgery and the Kyrgyz Association of Traumatology and Orthopedics, we express our sincere interest in strengthening our professional relationship between our organizations.

We believe that bringing together experience, knowledge and resources will contribute to the development of Orthopedics and Traumatology - joint surgery both in Kyrgyzstan and the Turkic World countries. We consider it important to consider the following basic issues within the scope of expanding our cooperation.

All conditions will be created for the exchange of scientific and clinical experience, joint webinars, professional congresses and conferences, publication of the Scientific Journal of Orthopedic Surgery and Trauma and other scientific formats.

Kyrgyzstan is ready to follow and implement technological developments in orthopedic surgery among the countries in Central Asia.

Best regards,

*Prof. Sabyrbek A. Dzhumabekov*
